

# Ambrose Community Garden

## June 2012 update - Gardeners and Sponsors

The Ambrose Community Garden now has a beautiful fence which was financed by a generous grant from Supervisor Federal Glover and the Keller Canyon Mitigation Fund Committee. Future plans include a large picnic table under a shaded arbor, storage shed, greenhouse and gazebo. Another project will be a brick paved walkway from the entrance which will be funded by and feature Memorial bricks from members of the community. Maybe you would like to remember someone with a Memorial brick! We are also looking for individuals, schools and organizations that might be interested in creating murals to be displayed on the garden fence. The Garden is well on its way toward becoming an outdoor community center for the Bay Point and greater Ambrose Recreation & Park District community.

Stop by and visit as the garden will usually be open during the daytime to members of the community. Just remember that no garden produce should be picked without specific permission from the gardener assigned to each garden box! Please respect the enjoyable but hard work of those gardeners! In the future we would like to have a program to distribute excess fruit and vegetables to people in the community. Individuals who have fruit trees and gardens at home who might like to participate or who would just like to become involved in such a program are most welcome!

Garden Boxes are now available to interested gardeners. Many of the boxes come with plants already growing to give you a head start or you can start fresh. If you don't need a specific garden box, but want to become involved with the garden you would be most welcome. We have a number of projects that need financial support and volunteer help. Individuals, businesses and organizations that help will be recognized on posted plaques at the garden. Financial donations to the Ambrose Community Garden made through the Bay Point Garden Club (503.c non-profit) can be tax deductible.

For more information on how to become involved with the Ambrose Community Garden please contact Project Coordinator, Michael E. Kerr preferably with e-mail

[mekorganic@yahoo.com](mailto:mekorganic@yahoo.com) but you may also call (925) 219-6518 after 9am.
